Dobra ponuda jagnjadi	2
Pregled cijena žive stoke	3-7
Uzroci jalovosti krava	8

DOBRA PONUDA NA BERANSKOJ PIJACI

Na pijaci u Beranama je u toku prethodne nedjelje bila dobra ponuda stoke. U prodaji je bilo 46-toro teladi, 41-no prase, 90-toro jagnjadi, 22 priplodne koze i još dosta grla drugih vrsta. Cijena je zadržana na nivou od prethodne nedjelje kod većine vrsta a blagi porast je primjetan kod ovnova, priplodnih koza i priplodnih krava.

Zanimljivo je to da u prodaji nije bilo priplodnih junica.

Na pijaci u Nikšiću ponuda stoke je bila jako slaba, u ponudi je bilo 50-toro jagnjadi i 20-toro prasadi. Za razliku od slabe ponude stoke na pijaci, trgovina u ovoj opštini je bila veoma dobra ali se odvijala direktno na farmama.

REPUBLIKA CRNA GORA
MINISTARSTVO POLJOPRIVREDE,
ŠUMARSTVA I VODOPRIVREDE

IZVJEŠTAJ O CIJENAMA ŽIVE STOKE

Datum prikupljanja podataka: 10. - 16. 8. 2006. godine

UZROCI JALOVOSTI KRAVA

Nepravilni znaci polnog žara mogu se svrstati u dvije grupe: nepravilnosti izražene jakim i tihim gonjenjem.

Jako gonjenje ispoljava se na taj način što životinja pokazuje znake velike uznemirenosti. Jako gonjenje prouzrokuje veće smanjenje dnevne količine mlijeka. Znaci jakog gonjenja traju duže od normalnog i izazivaju nepravilne vremenske razmake između dva gonjenja.

Tiho gonjenje je česta pojava kod debelih krava i junica, kao i kod krava visoke mliječnosti.

Uzroci neplodnosti krava i junica mogu biti različiti. Neke od njih može sam stočar da otkloni a neke treba liječiti. U slijedećem tekstu navešćemo par najčešćih razloga neplodnosti.

Jedan od uzroka neplodnosti je ostavljanje u priplod ženskog grla koje je blizanac muškom teletu. U većini ovih slučajeva junica je neplodna.

Drugi razlog je prevelika uhranjenost junice. Junice treba da se što više kreću na svježem vazduhu i suncu uz osrednju ishranu.

Kada je riječ o jalovosti treba istaći da ima i urođenih jalovosti koje životinje donose na svijet rođenjem. Oni nastaju zbog nedovoljnog i nepravilnog razvoja polnih organa a može se desiti da ih uopšte nema.

Čest razlog jalovosti je gladni sterilitet. Ovaj oblik jalovosti je izražen u toku zime i za vrijeme sušnih godina kada se životinje nedovoljno i nepravilno hrane. Tada ne samo da je smanjena količina hrane nego u sebi ne sadrži mineralne materije, posebno fosfor, koji ima posebno važnu ulogu u razvoju organa za oplodnju. Takođe, tada dolazi i do poremećaja odnosa kalcijuma i fosfora što negativno utiče na jajnike i matericu i izaziva izostanak gonjenja, tihi estrus i dr. Pored oblika jalovosti koji su posljedica oboljenja pojedinih polnih organa, javlja se jalovost koja može biti posljedica oboljenja nekih drugih vitalnih organa kao što su srce, mozak, nervi, organi za kretanje a da polni organi budu potpuno zdravi.
