## PONUDA NA STOČNIM PIJACAMA

### Cijene stabilne

**Ponuda stoke na stočnim pijacama i dalje je slaba dok i dalje dominiraju telad, krave za klanje i jagnjad.**

**Cijene su uglavnom ostale iste a pad je primjetan jedino kod jaradi koja su sa 2,49 pala na 2,33€ (-0,16€). Kada je riječ o junicma primjetna je visoka cijena za junice HF rase koja se u Nikšiću kretala do 1400€ po grlu.**

#### Bar

Karakteristika ove nedjelje je pad cijene jaradi što je razlog povećane tjelesne težine sa većom starošću. Cijene ostalih kategorija su uz mala variranja kao i prethodne nedjelje. Ponude na pijaci i dalje nema a trgovina se obavlja na farmama odakle i potiču navedene cijene.

#### Berane

Ovu sedmicu na stočnoj pijaci u Beranama obilježila je izuzetno velika ponuda jagnjadi i priplodnih ovaca.

Dobra ponuda i tražnja je i dalje kod kategorije teladi, a cjenovni trend je nepromijenjen. Kod ostalih kategorija i vrsta žive stoke nema značajnijih promjena.

#### Nikšić

Ove nedjelje se bilježi umjeren pad cijene jagnjadi, kao i jak pad cijene jaradi. Dominantna cijena kg žive mjere jaradi je pala sa 2,7€ po kg, koliko su prodavana prošle nedjelje, na 2,2. Evidentan je i rast cijene priplodnih junica holštajn frizijske rase. Pojedina grla visokog genetskog potencijala se prodaju po 1400€, dok farmeri često nude

visokosteone junice po cijeni i do 1600€ po grlu.

Cijene žive stoke, kao i broj prodatih grla uzete su direktno sa farmi.

Na stočnoj pijaci u Nikšiću nije bilo ponude.

### Pljevlja

Protekla nedelja zabilježena je dobra ponuda jagnjadi. Razlog je duži sušni

period. Ponuda ostalih kategorija stoke je bez bitnijih promjena. Cjenovni trend je na istom nivou kao i protekle nedelje, izuzimajući blagi pad cijena kod jagnjadi.

### Bijelo Polje

U toku ove sedmice na bijelopoljskim stočnim pijacama nije bilo značajnijih promjena ponude i cijena svih vrsta i kategorija stoke.

## VAŽNE PREPORUKE ZA ISHRANU KRAVA

- Obezbijediti kravama puno svijetla, vode, kretanja i kvalitetne hrane.
- Kravama u ranoj laktaciji i visokomliječnim grlima davati najkvalitetniju hranu.
- Krave treba da imaju na raspolaganju hranu i svijetlo 20 časova u toku dana, a vodu 24 časa.
- Nastojati davati kravama ista hraniva, bez naglih promjena jer stresno reaguju na promjenu hrane.
- Hranu u jaslama što češće prevrtati, zbog podsticanja na češće konzumiranje.
- Ako temperatura u objektu prelazi 24°C dolazi do smanjenja konzumiranja hrane. Za svaki stepen povećanja temperature konzumiranje SM se smanjuje za oko 2,8%. Zato bi trebalo veći dio obroka obavljati noću.
- Kravama ne smeta niska temperatura i treba im obezbijediti dovoljno svježeg vazduha i zimi.
- Kravama u fazi zasušenja davati istu hranu koju su konzumirale tokom laktacije. Zasušenim kravama u prvoj fazi zasušenja davati malu količinu koncentrata (1,5-2 kg/dan), a u drugoj fazi povećati na 3-4 kg/dan (voditi računa o edemu vimena).
- Nakon telenja postepeno povećavati količinu konc. za oko 0,5-1kg/dan.
- Na svaki kg očekivane proizvodnje mlijeka neophodno je da krave konzumiraju 0,5 kg SM. Manje od toga dovodi do gubitka u kondiciji i češće pojave metaboličkih poremećaja.
- Ako se koncentrat daje posebno, treba ga davati u više doza po 2-3kg.
- Krave koje se muzu tri puta dnevno, jedu oko 5-6% više SM nego pri dvokratnoj muži. Treba obezbijediti čistu vodu 24 časa dnevno. Krave piju 4 l vode za 1 kg proizvedenog mlijeka. Davati 30 g soli obogaćene mikroelementima za uzdržne potrebe i po 20 g za svakih 10 kg mlijeka. Kod zasušenih krava paziti na odnos Ca i P. Treba da bude 2:1, odnosno 80-100 g Ca i 45 g P. U cilju sprečavanja pojave ketoze ne dozvoliti gojenje zasušenih krava. Krava treba da bude u istoj kondiciji pri zasušenju i pri telenju.
