PONUDA NA STOČNIM PIJACAMA

Bar

Cijene pojedinih kategorija stoke ove nedjelje bile su znatno više u odnosu na prethodnu.

S obzirir da se primiču vjerski i novogodišnji praznici ponuda i tražnja žive stoke na pijacama u Ulcinju i Baru znatno je povećana kao i cijene. Cijene su imale veći porast u Ulcinjskim pijacama i to muške šilježadi i ovnova koji su se uglavnom prodavali od 120-160€ bez mjerenja, kao i junadi čija je ponuda i tražnja bila dosta dobra. Za pijačne dane u sljedećoj nedjelji možemo očekivati još veću ponudu i tražnju posebno za muškom šilježadi, ovinovima i bikovima a možda i nešto veće cijene.

Berane

Ove sedmice na stočnoj pijaci u Beranama nije bilo zapaženijih promjena. Nastavlja se dobra ponuda teladi, junadi, prasadi, šilježadi i priplodnih krava

(meleza). Tražnja je veća u odnosu na ponudu kod priplodnih junica u čistoj rasi i one se mogu naći samo na poljoprivrednim gazdinstvima. Cjenovni trend je ostao na istom nivou.

Nikšić

Cijene su nepromijenjene u odnosu na prošlu nedjelju. Zbog loših vremenskih prilika ponuda na pijaci je lošija.

Pljevlja

Ove sedmice ponuda stoke približno slična prethodnoj. Cijene su bez bitnih promjena. I dalje mali broj kupaca. Nešto veća ponuda i potražnja očekuje se u narednom periodu.

Bijelo Polje

U toku ove nedjelje na stočnim pijacama u Bijelom Polju nije bilo osjetnih promjena.

U ponudi je povećan broj volova za klanje.

MERINO ARL

Merino arl je francuska rasa ovaca, nastala u mestu Arlu. Spada u grupu rasa ovaca za proizvodnju najfinije vune.

Životinje su snažne konstitucije, srednje krupne, dobro je obrasle vunom (samo je dio glave ispod očiju i noge ispod lažnih koljena i skočnih zglobova obrastao dlakom).

- **Masa tijela ovaca je oko 40 kg, a ovnova 60 kg.**
- **Godišnji nastrig neprane vune u ovaca iznosi od 3 do 5 kg.**

- **Finoća vunskih vlakana iznosi 18-20 mikrona, a prosječan randman vune iznosi oko 35%.**
- **Ovce ove rase su veoma otporne, sposobne za duga pješačenja u potrazi za hranom. Dobro su adaptirane za uzgoj u planinskim regionima pa je zato ova rasa korišćena za oplemenjivanje nekih sojeva pramenke (pirotske).**
