Izbor jagnjadi za priplod	8

PONUDA NA STOČNIM PIJACAMA

Loša pijaca u Podgorici

Na podgoričkoj stočnoj pijaci u ponudi je bilo veoma malo stoke. Usljed slabe ponude i cijene su bile pojačane a na ovoj pijaci bilježimo i najveću cijenu priplodnih ovaca u Crnoj Gori koja se kretala od 95 do 180€/grlu.

U Baru je na pijaci ponuđeno 8 prasadi sa cijenom od 2,5€/kg žive mjere i 15 jagnjadi sa cijenom od 3€/kg žive mjere dok ostalih kategorija nije bilo na pijaci već se njima trgovalo na farmama. Od ponude u Nikšiću možemo izdvojiti priplodne ovce (50 grla) sa cijenom od 120 do 150€/grlu.

U Beranama je najbolja ponuda prasadi (25 grla sa cijenom od 2,3 do 2,5€/kg žive mjere) i jagnjadi (25 grla sa cijenom od 2,6 do 2,7€/kg žive mjere). U Pljevljima je i dalje slaba ponuda stoke a najviše je bilo jagnjadi (30 grla) sa cijenom od 2,5 do 2,7€/kg žive mjere. U Bijelom Polju je ponuđeno najviše teladi (18 grla) sa cijenom od 2,2 do 2,6€/kg žive mjere.

Bar

Cijene u odnosu na prethodnu nedelju su bez bitnih variranja, osim što su se jagnjad nudila po nešto nižoj cijeni koja je iznosila 3€/kg žive mjere.

Ponuda na pijacama je i dalje slaba pa se i dalje trguje po farmama. Karakteristična je mala potražnja za već pristiglu jagnjad za prodaju što se odražava i na cijenu. Ostalim kategorijama se trguje bez bitnih promjena, stim što se potražnja za teladi

malo povećala jer je bilo malo problema oko prodaje.

Berane

Ove sedmice na stočnoj pijaci u Beranama ponuda je bila slabija u odnosu na prethodnu nedjelju. Cjenovni trend je u umjerenom padu kod kategorija teladi, jagnjadi i priplodnih ovaca, dok je kod ostalih kategorija na istom nivou.

Tražnja je na nivou od prošle nedjelje.

Nikšić

Cijene žive stoke nijesu se mijenjale u odnosu na prošlu nedjelju. Na stočnoj pijaci ni ove nedjelje nije bilo ponude.

Pljevlja

Na pijacama u Pljevljima ponuda stoke je i dalje loša. Trgovalo se uglavnom na farmama i ponuda je bila nešto bolja nego prethodne sedmice. Zbog poboljšanja otkupa mlijeka, došlo je do veće potražnje priplodnih krava i steonih junica. Cijene su bez bitnijih promjena.

Bijelo Polje

Zbog loših vremenskih prilika, te otežanog transporta grla do stočnih pijaca,

ponuda svih vrsta i kategorija stoke tokom ove sedmice bila je lošija. Dio prodaje obavljan je i na farmama (prasad, priplodne ovce i krave) ili su farmeri sami transportovali grla ugovorena za prodaju na klanicama (to se prije svega odnosilo na telad i jagnjad).

Podgorica

Trend slabe ponude stoke nastavljen i ovog ponedjeljka na podgoričkoj stočnoj pijaci. Bilježimo jedino solidnu prodaju prasadi po prosječnoj cijeni od 2,3€/kg žive vage kao i vanpijačnu prodaju biko-va. Jagnjadi je i dalje malo, svega desetak grla sa prosječnom cijenom od 3€/kg žive vage.

REPUBLIKA CRNA GORA MINISTARSTVO POLJOPRIVREDE, ŠUMARSTVA I VODOPRIVREDE

IZVJEŠTAJ O CIJENAMA ŽIVE STOKE

IZBOR JAGNJADI ZA PRIPLD - ZA REMONT

Prva selekcija i odabir jagnjadi za priplod vrši se u vrijeme odbića, tj. sa oko 2,5 do 3 mjeseca. Za priplod se odabiraju grla od najboljih roditeljskih parova po mogućnosti iz blizanačkih poroda (od majke koja je rodila i odgojila blizance). Grla moraju biti korektne građe i zdrava, bez eventualnih pojava hermafroditizma ili kriptorhizma, takođe dobro provjeriti postojanje eventualnih drugih anomalija koje se na prvi pogled teže uočavaju - skraćena donja vilica i sl.

Za zamjenu sopstvenog stada ostavlja se 5-10% jagnjadi više od potrebnog broja, jer će izvjesna grla otpasti u kasnijim odabiranjima prije nego što uđu u priplod.

Jagnjad za priplod se umjereno hrane (paša i prihrana koncentrovanom hranom, ali ne smiju se pretoviti. Najbolja hrana za odlučenu jagnjad ostavljenu za priplod je dobra paša. Da bi se iskoristio period intenzivnog prirasta potrebno je jagnjad pravilno hraniti, tj. po potrebi prihranjivati koncentratom (maksimalno do 250g/gan), ali ne smije se pretoviti.

Priplodni podmladak može ući u pripust – parenje, ako je dostigao fizičku i fiziološku zrelost, odnosno samo ako je ostvario minimalno 75% tjelesne mase odraslog grla.
