Ponuda na stočnim pijacama	2-3
Pregled cijena žive stoke	3-7
Vještačko osjemenjavanje	8-9

PONUDA NA STOČNIM PIJACAMA

Najbolja ponuda teladi i jagnjadi

U toku prethodne nedjelje u ponudi je bilo najviše teladi i jagnjadi, što je uslovilo blagi pad cijene jagnjadi.

Na podgoričkoj pijaci bila je najbolja ponuda teladi i to 20 grla sa cijenom od 3,1 do 3,3€/kg žive mjere.

U Nikšiću je zabilježena ponuda teladi sa cijenom od 3 do 3,2€/kg žive mjere.

Dobra ponuda teladi bila je i u Beranama (16 grla) i Bijelom Polju (11 grla). Cijena im se kretala od 2,2 do 2,9€/kg žive mjere u Beranama, i 2,55 do 2,6€/kg žive mjere u Bijelom Polju.

Ponuda teladi na pijaci u Baru i Pljevljima je nešto slabija. U Baru je ponuđeno 8 grla sa cijenom od 2,8 do 3,1€/kg žive mjere, a u Nikšiću 6 grla sa cijenom od 2,7 do 2,9€/kg žive mjere.

Cijena jagnjadi se kretala od 2,2€/kg žive mjere u Beranama pa do 2,7€/kg žive mjere u Baru.

Bar

Cijene žive stoke ove nedjelje su bez bitnih promjena u odnosu na prethodnu. Trguje se uglavnom na farmama bez bitnih promjena u odnosu na ponudu i tražnju, najčešće jagnjadi, jaradi i teladi.

Berane

Ove sedmice na stočnoj pijaci u Beranama dobra ponuda je bila kod jagnjadi, a najbolja tražnja kod kategorija teladi i junadi. Cjenovni trend je na nivou od prošle sedmice, osim kod prasadi i priplodnih koza.

Nikšić

Na stočnoj pijaci u Nikšiću nije bilo ponude žive stoke. Cijene su uzete direktno od farmera, a uglavnom su se kretale na prošlonedjeljnom nivou. Zbog velike ponude jagnjadi primijećen je blag pad cijene, dok se cijena priplodnih krava holštajn frizijske rase vratila na prethodni nivo.

Pljevlja

Na pijacama u Pljevljima nije bilo bitnijih promjena u ponudi stoke u odnosu na predhodnu sedmicu. Cijena teladi kretala se od 2,5€ po kg žive mjere na lokalnoj pijaci u Boljanićima do 2,9€ na pijaci u Vrulji. Cijena jagnjadi je zabilježila blagi pad, a razlog je veća ponuda.

Bijelo Polje

U toku ove sedmice na bjelopoljskim pijacama nije bilo promjena osim kod kategorija jagnjdi i teladi gdje je ponuda u osjetnom porastu što je uticalo na pad cijene jagnjadi.

Cijene su kod ostalih kategorija zadržale prošlonedjeljni trend.

Podgorica

I ove nedjelje slaba ponuda stoke zbog velikih vrućina. Najbolja ponuda je bila jagnjadi i prasadi što je uslovilo blagi pad cijene tih grla. Cijene ostale stoke su ostale na prošlonedjeljnom nivou.

CRNA GORA MINISTARSTVO POLJOPRIVREDE, ŠUMARSTVA I VODOPRIVREDE

IZVJEŠTAJ O CIJENAMA ŽIVE STOKE

VJEŠTAČKO OSJEMENJIVANJE

Vještačko osjemenjivanje je biotehnička mjera pomoću koje na najefikasniji i najsigurniji način dolazi do izmjene rasnog sastava u željenom pravcu. Upotrebom sjemena kvalitetnih priplodnjaka povećavaju se proizvodne osobine rasa, linija i stada, a samim tim i individua. Vještačko osjemenjivanje je veoma važno sa veterinarsko sanitarnog aspekta jer sprječava prenošenje zaraza. Sjemenom jednog bika može se za godinu dana osjemeniti oko 10.000 plotkinja, a prirodnim parenjem jedan bik može da oplodi oko 200 krava. Zamrznuto sjeme se može transportovati hiljadama kilometara.

Vještačko osjemenjivanje primjenjuje se na ovim prostorima od 1951. godine a od

1967. godine zamrzavanje, konzerviranje i čuvanje sjemena vrši se u tečnom azotu. Uspjeh osjemenjivanja mnogo zavisi od pravog vremena osjemenjivanja i ono je 12 - 18 sati od pojave prvih simptoma tjeranja. Uspjeh zavisi i od tehnike otapanja sjemena jer ono se mora otopiti na temperaturi od 38 - 40°C u trajanju od 20 - 30 sekundi. Uspjeh osjemenjivanja zavisi i od pravilnog ubacivanja sjemena u reproduktivne organe plotkinje.

Bikovi koji se upotrebljavaju za proizvodnju sjemena su odabrani po porijeklu, spolnjem izgledu i moraju biti zdravi. Ovi bikovi su testirani na značajne proizvodne i druge osobine.
