Ponuda na stočnim pijacama	2-3
Pregled cijena žive stoke	3-7
Važne preporuke za ishranu krava	8

PONUDA NA STOČNIM PIJACAMA

Cijene stabilne

Ponuda stoke na stočnim pijacama slična je prethodnoj nedjelji. I dalje dominiraju telad, krave za klanje i priplodne ovce.

Cijene su uglavnom ostale iste.

Služba za selekciju stoke svim poljoprivrednim proizvođačima čestita Novogodišnje praznike.

Bar

Cijene žive stoke ove nedjelje su okvirno na nivou od prethodne što je i karakteristično za ovaj period godine. Imamo najbolju ponudu junadi i krava za klanje. Ponuda junadi različitih veličina je dosta dobra kako na pijaci tako i na pojedinim farmama dok je tražnja nešto slabija.

Berane

Na stočnoj pijaci u Beranama ponuda, tražnja i cjenovni trend su bili na nivou od prošle nedjelje.

Nikšić

Što se tiče cijena na nikšićkoj pijaci bilježimo porast cijene jagnjadi, pa se ona prodaju po

dominantnoj cijeni od 2,8€/kg žive mjere, a njihova maksimalna cijena je do 3€ po kg žive mjere. Cijene ostalih vrsta i kategorija stoke su na prošlonedjeljnom nivou. Na nikšićkoj pijaci je ponudeno 35 jagnjadi, 2 teleta, 2. junadi do 300 kg, 3 krave za klanje i 3 ovna.

Pljevlja

Izuzetno dobra ponuda svih vrsta stoke zabilježena je protekle sedmice na pijacama i farmama u Pljevljima. Najviše je u ponudi bilo prasadi 35 sa cijenom od 3 €/kg žive mjere. Takođe, zabilježena je dobra ponuda teladi i jagnjadi. Razlog dobre ponude su predstojeći praznici. Cijene kod svih kategorija stoke nijesu se bitnije mijenjale.

Bijelo Polje

Na stočnoj pijaci u Bijelom Polju ponuda, tražnja i cjenovni trend ostali su na nivou od prošle sedmice.

Podgorica

Na podgoričkoj stočnoj pijaci zbog novogodišnjih i božićnih praznika veoma se malo trgovalo te su i ponuda i tražnja bile veoma slabe. Šilježadi je bilo najviše, ali u odnosu na prethodne pazare veoma malo. Cijene se nije su bitnije mijenjale.

VAŽNE PREPORUKE ZA ISHRANU KRAVA

- Obezbijediti kravama puno svijetla, vode, kretanja i kvalitetne hrane.
- Kravama u ranoj laktaciji i visokomliječnim grlima davati najkvalitetniju hranu.
- Krave treba da imaju na raspolaganju hranu i svijetlo 20 časova u toku dana, a vodu 24 časa.
- Nastojati davati kravama ista hraniva, bez naglih promjena jer stresno reaguju na promjenu hrane.
- Hranu u jaslama što češće prevrtati, zbog podsticanja na češće konzumiranje.
- Ako temperatura u objektu prelazi 24°C dolazi do smanjenja konzumiranja hrane. Za svaki stepen povećanja temperature konzumiranje SM se smanjuje za oko 2,8%. Zato bi trebalo veći dio obroka obavljati noću.
- Kravama ne smeta niska temperatura i treba im obezbijediti dovoljno svježeg vazduha i zimi.
- Kravama u fazi zasušenja davati istu hranu koju su konzumirale tokom laktacije.
- Zasušenim kravama u prvoj fazi zasušenja davati malu količinu koncentrata (1,5 - 2 kg/dan), a u drugoj fazi povećati na 3-4 kg/dan (voditi računa o edemu vimena)
- Nakon telenje postepeno povećavati količinu konc. za oko 0,5-1kg/dan.
- Na svaki kg očekivane proizvodnje mlijeka neophodno je da krave konzumiraju 0,5 kg SM. Manje od toga doводи do gubitka u kondiciji i češće pojave metabolitičkih poremećaja.
- Ako se koncentrat daje posebno treba ga davati u više doza po 2-3kg.
- Krave koje se muzu tri puta dnevno, jedu oko 5-6% više SM nego pri dvo-kratnoj muži. Treba obezbijediti čistu vodu 24 časa dnevno. Krave piju 4 l vode za 1 kg proizvedenog mlijeka. Davati 30 g soli obogaćene mikro-elementima za uzdržne potrebe i po 20 g za svakih 10 kg mlijeka. Kod zasušenih krava paziti na odnos Ca i P. Treba da bude 2:1, odnosno 80-100 g Ca i 45 g P. U cilju sprečavanja pojave ketoze ne dozvoliti gojenje zasušenih krava. Krava treba da bude u istoj kondiciji pri zasušenju i pri teljenju.
