## PONUDA NA STOČNIM PIJACAMA U Beranama najbolja ponuda teladi

U Beranama u toku prethodne nedjelje imali smo najbolju ponudu i najnižu cijenu teladi. U ponudi je bilo 44 grla sa cijenom od 2,6 do 3€/kg žive mjere.

U Pljevljima cijena teladi se kretala od 2,7 do 3€/kg žive mjere i ponudi je bilo 34 grla, prodaja se obavljala na farmi i na pijaci.

Na podgoričkoj stočnoj pijaci u ponudi je bilo 20 teladi sa cijenom od 3,1 do 3,4€/kg žive mjere.

U Bijelom Polju cijena teladi se kretala od 2,7 do 3,3€/kg žive mjere, u ponudi je bilo 13 grla.

U Nikšiću i dalje nema ponude na pijaci, trgovina se obavljala na farmama. U ponudi je bilo 12 grla sa cijenom od 2,8 do 3,1€/kg žive mjere.

U Baru imali smo lošu ponudu teladi svega 8 grla sa cijenom od 2,8 do 3,3 €/kg žive mjere.

Na svim pijacama dominira trgovina jagnjadima što je i karakteristično za ovaj vremenski period. Cijena jagnjadi se kretala od 2,2 do 3€/kg žive mjere.

### Bar

Cijene žive stoke ove nedjelje nijesu se bitnije mijenjale u odnosu na prethodnu nedjelju. Ponude na pijaci nijesmo imali, trguje se na farmama odakle i potiču navedene cijene.

### Berane

Ponuda žive stoke u Beranama ove nedjelje je bila dobra, najbolja je kod kategorije teladi. Cjenovni trend je u blagom padu kod teladi, dok je kod ostalih kategorija na istom nivou

kao i prethodne nedjelje. Tražnja je manja u odnosu na ponudu.

### Nikšić

Na stočnoj pijaci u Nikšiću i dalje nema ponude. Sezona je prodaje jagnjadi, pa je samim tim i njihova ponuda najbolja. Dominantna cijena jagnjadi je 2,4 €/kg žive mjere.

### Pljevlja

U Pljevljima i dalje je najbolja ponuda jagnjadi, a protekle sedmice takođe je zabilje-

žena dobra ponuda teladi. Došlo je do umjerenog pada cijene jagnjadi i ona se kretala od 2€/kg do 2,3€, a to je uslovlila dobra ponuda. Cijene kod ostalih kategorija stoke nijesu se bitnije mijenjale.

### Bijelo Polje

Na stočnim pijacama u Bijelom Polju ponuda stoke ove sedmice je u blagom padu u odnosu na prošlu, novina u ponudi su jarad, krave za klanje simentalske rase i priplodne ovce. Dobar dio prodaje se obavljao na farmama. Nije bilo promjena u pogledu cijena,

tako da su cijene žive stoke zadržale svoje vrijednosti kao u prošloj nedjelji.

### Podgorica

Na podgoričkoj pijaci nešto bolja ponuda u odnosu na prošlu nedjelju, dok je potražnja slabija. I dalje je najbolja ponuda jagnjadi. Cijene se takođe nijesu mijenjale u odnosu na prošlu nedjelju.

## Značaj i opšte osobine stočne hrane

Hrana je najdirektnija veza životinje sa spoljašnjom sredinom. Stočna hrana predstavlja materiju koja se sastoji od proteina, vitamina i energije, koje su neophodne za obezbjedjivanje životnih funkcija i porasta životinje. Ovaj tekst ima za cilj da podsjeti našeg kupca na principe ishrane domaćih životinja.

### Stočna hrana

Pod stočnom hranom se podrazumijeva sve ono što je unijeto u organizam, prije i poslije resorpcije iz sistema za varenje i što može da izvrši jednu od sljedećih funkcija u organizmu:

1. Obezbjeđenje energije
2. Obezbjeđenje materijala za izgradnju tkiva
3. Podrška odvijanju funkcija i tkiva
4. Neškodljivost zdravlju i neometanje iskorišćenja drugih materija hrane
5. Podrška rentabilitetu stočarske proizvodnje

U slobodnom načinu držanja životinja se može obezbijediti preko paše, iz mlijeka

(mladunčad) ili cijelim tijelom druge životinje (mesojedi). Pojedinačna hraniva se danas rijetko upotrebljavaju u ishrani domaćih životinja zbog toga što se u pojedinačnim hranivima ne nalaze sve potrebne hranljive materije. Hraniva se u krmnim smješama mogu zamjenjivati na osnovu izodinamičnosti njenih sastojaka.

### Industrijski proizvedene smješe stočne hrane se dijele na:

- kompletne ili potpune
- dopunske ili superkoncentrate
- premikse ili mineralno-vitaminske predsmješe

### Ocjena kvaliteta stočne hrane

Najznačajniji pokazatelj kvaliteta je sadržaj hranljivih materija u hranivu u odnosu na potrebe životinja. Pri ocjeni kvaliteta hrane za životinje uzima se u obzir hemijski sastav, fizičke osobine, uticaj na apetit, na konzumaciju (ukusnost), kao i uticaj ishrane – hrane na fiziološke procese, zdravstvena, hemijska, mikrobiološka, toksikološka ispravnost, kao i uticaj hrane na kvalitet stočnih proizvoda.
