PONUDA NA STOČNIM PIJACAMA

Lošija ponuda stoke

Na svim stočnim pijacama bilježimo lošiju ponudu.

Na beranskoj stočnoj pijaci i u Nikšiću u ponudu je bilo po 15 teladi. U Beranama u ponudi su bila telad simentalke rase sa cijenom 3€/grlu, a ostala po cijeni od 2,8 do 3€/kg žive mjere. U Nikšiću cijena teladi se kretala od 2,8 do 3,1€/kg žive mjere.

U Pljevljima u ponudi je bilo 11 teladi po cijeni od 2,8 do 2,9€/kg žive mjere.

U Podgorici i Baru ponuđeno je po 7 teladi sa cijenom od 2,8 do 3,2 €/kg žive mjere.

U Bijelom Polju telad simentalke rase nudena su po cijeni 2,8 do 3€/kg žive mjere, a ostala po cijeni 2,7 do 2,8€/kg žive mjere.

Bar

Cijene žive stoke ove nedjelje nijesu se bitnije mijenjale u odnosu na prethodnu. Na pijaci u Baru u ponudi smo imali dvije utovljene svinje i sedam grla junadi, dok smo na pijaci u Vladimiru imali dobru ponudu junadi i krava za klanje. Ponuda jagnjadi je slaba, dok je ponuda tovljenika na lučkoj ekonomiji dosta dobra. Za sve navedene kategorije tražnja je znatno slabija od ponude.

Berane

Ove nedjelje na stočnoj pijaci u Beranama ponuda žive stoke je bila slaba, cjenovni

trend je ostao na istom nivou osim kod kategorija junadi i teladi gdje je u blagom porastu. Tražnja je mala.

Nikšić

Na stočnoj pijaci u Nikšiću ove nedjelje nije bilo ponude žive stoke pa su cijene uzete direktno sa farmi. Ponuda stoke je lošija u odnosu na prethodne nedjelje a cijene su ostale na istom nivou, osim cijene jagnjadi koja je u blagom porastu i kreće se od 2,6 do 2,8 €/kg žive mjere.

Pljevlja

Nešto lošija ponuda stoke protekle sedmice zabilježena je na pljevaljskim pijacama. Trgovina se uglavnom obavljala na farmama. Cijene su ostale na prošlonedjeljnom nivou.

Bijelo Polje

Veoma slaba ponuda stoke u Bijelom Polju zbog loših vremenskih uslova. Prodaja se u glavnom odvijala na farmama, cijene su zadržale nepromijenjene vrijednosti za sve kategorije žive stoke.

Podgorica

Znatno slabija ponuda stoke u Podgorici ovog ponedjeljka. U odnosu na prethodne pijace kada je u ponudi bilo prosječno oko 250 grla šilježadi danas je nudeno oko 70-tak grla sa prosječnom cijenom od 2,7 €/kg žive mjere. Prasad su prodavana za 3,2 dok je cijena tovljenika bila 2,2 €/ kg žive mjere. Od ostalih vrsta i kategorija stoke izdvajamo ponudu priplodnih ovaca oko 35 grla sa maksimalnom cijenom od 120 €/grlu.

CRNA GORA MINISTARSTVO POLJOPRIVREDE, ŠUMARSTVA I VODOPRIVREDE

EDEM (OTOK) VIMENA

Otok vimena krava najčešće nastaje nekoliko dana ili nedjelja prije teljenja. Smatra se da je glavni uzrok nastajanja edema vimena zastoj venske krvi usljed pritiska ploda na vene u karličnoj šupljini. Međutim, edem vimena može nastati nezavisno od porođaja zbog: slabosti srca, dugotrajnog ležanja, naduna visokogravidnih životinja, nepravilne muže. Ovo stanje se pogoršava u periodu oko porođaja.

Klinički znaci:

- Mliječna žlijezda postaje velika, a sise su „urasle“ u otok.
- Otok je najizraženiji na zadnjim četvrtima, a može da dopire sve do grudne kosti.
- Otok je tvrde ili meko-tjestaste konzistencije, bezbolan.
- Koža otečenog vimena je nepomična, napeta i sjajna, ponekad i crvena.

Ako je otok umjerene veličine i nastaje spontano u prvim danima (8-10 dana) nakon teljenja, u pitanju je tzv. **fiziološki edem**.

O **patološkom edemu** mliječne žlijezde se govori ako je:

- edem enormne veličine, tvrd, bolan i ne nastaje brzo poslije porođaja
- opšte stanje životinje je nepromijenjeno, ali jači otok smeta životinji pri

hodanju, a nakon porođaja otežava ili onemogućuje mužu i sisanje.

Patološki edemi mogu lako završiti prestankom lučenja mlijeka ili zapaljenjem mliječne žlijezde - mastitisom, zbog teškoća pri muži.

Liječenje edema vimena je potrebno ako se jave smetnje u kretanju životinje.

Preporučuje se:

- duga šetnja životinja
- smanjenje količine hrane, a naročito tečnosti u trajanju od nekoliko dana
- masaža vimena uz primjenu resorbenčnih masti
- stavljanjem Burovih obloga
- stavljanjem obloga od 60% alkohola
- muža krava nekoliko dana pred teljenje, ali ne treba vime potpuno izmusti, jer time bi lišili mladunče neophodnog kolostruma.

Poslije teljenja preporučuje se često izmuzanje i češće sisanje teleta. Pri patološki edemima, koji se nakon teljenja nijesu povukli, veterinar može pokušati liječenje diureticima, infuzijama kalcijuma uz kretanje, dijetu i dr. Terapija patološkog edema vimena krava doprinosi preventivi mastitisa, većoj proizvodnji mlijeka i njegovoj higijenskoj ispravnosti.
