Ponuda na stočnim pijacama	2-3
Pregled cijena žive stoke	3-7
Kraj laktacije	8

PONUDA NA STOČNIM PIJACAMA U Pljevljima najbolja ponuda priplodnih ovaca

Najbolja i najpovoljnija ponuda priplodnih ovaca prethodne nedjelje bila je na pljevaljskim farmama i to 50 grla sa cijenom od 90 do 110€/grlu.

U Nikšiću trgovina ovacama se obavljala, takođe, na farmama u ponudi je bilo 40 grla sa cijenom od 100 do 140 €/grlu.

Na podgoričkoj stočnoj pijaci u ponudi je bilo 30 ovaca sa cijenom od 90 do 140€/grlu, dok se u Bijelom Polju kretala od 120 do 150€/grlu i u ponudi je bilo 10 ovaca.

Na beranskoj stočnoj pijaci bilježimo najvišu cijenu ovaca od 120 do 180€/grlu, u ponudi je bilo 25 grla.

U Baru nije bilo ponude ovaca.

Bar

Za razliku od prethodne ove nedjelje cijene junadi su u prosjeku niže 10%. Karakteristično za ovaj period imamo sve manju ponudu junadi što karakteriše i pad njihove cijene, što znači da se sezonski period klanja završava. Ponude na barskoj stočnoj pijaci nije bilo dok je na vladimirskoj bila dosta slaba.

Berane

Na stočnoj pijaci u Beranama ove nedjelje bila je dobra ponuda svih vrsta i kategorija žive stoke, tražnja je bila na istom nivou, kao i cjenovni trend, osim kod kategorija junadi

preko 300 kg gdje je bio u umjerenom padu i kod priplodnih koza u umjerenom porastu.

Nikšić

Ponuda žive stoke na farmama je lošija u odnosu na prethodni period, dok je na stočnoj pijaci nema. Bilježimo umjeren pad cijene junadi a ostale vrste i kategorije se prodaju po cijenama od prethodne nedjelje.

Pljevlja

Na pijacama u Pljevljima zabilježena je loša ponuda stoke. Trgovina se uglavnom obavljala na farmama, a najviše u ponudi je bilo

prasadi. Cijene su ostale na prošlonedjeljnom nivou.

Bijelo Polje

Ove sedmice na stočnim pijacama u Bijelom Polju primjetna je neznatno bolja ponuda u odnosu na prošlu, i to kod kategorija teladi, krava za klanje i ovaca za priplod. Cijene su zadržale nepromjenjene vrijednosti.

Podgorica

Bolja ponuda stoke u Podgorici u odnosu na prethodnu nedjelju. Šilježadi na ponudi je bilo oko 90 grla sa cijenom od 2,5 do 2,7€/kg žive mjere, prasad su prodavana od 3,2 ženska do 3,3 muška grla (u ponudi je bilo oko 55 grla), dok se cijena teladi kretala od 2,8 do 3,1€/kg žive mjere. Svinje tovljenici od 90 do 120 kg žive mjere prodavani su po 2€/kg.

Kraj laktacije

Ovce postižu maksimalnu proizvodnju mlijeka poslije treće ili četvrte nedjelje po jagnjenju. U drugom periodu laktacije tj. poslije 3. mjeseca, kada su ovce pretežno na ispaši, zbog bogatstva zelene mase u proteinima, koncentratni dio obroka treba da ima 10 % sirovih proteina, odnosno kao koncentrat može da se koristi zrnavlje žitarica (ječam, ovas, kukuruz). Kako u drugom dijelu laktacije opada mliječnost, treba smanjiti i količinu koncentrata postepeno, prvo na 200-300 g dnevno, a zatim na 100 – 200 g dnevno po grlu.

Silažu i korjenasto-krtolasta hraniva treba davati prije pojenja, a koncentrat poslije pojenja ovaca.

Voda za napajanje treba da bude čista i svježa, a zimi ne smije da bude zaleđena. Ovcama se so stavlja u specijalne korpe ili se koriste specijalni blokovi soli koje ližu po volji.

Prelaz sa zimskog obroka na pašu vrši se postepeno uz prethodno prihranjivanje ovaca suvom hranom (sijenom) ujutru prije nego što se istjeraju na pašnjak.
