ZAŠTITA MASLINE TOKOM MIROVANJA VEGETACIJE

Maslinu napada značajan broj štetočina i prouzrokovaca bolesti od kojih je maslinu tokom vegetacije potrebno štititi kako bi imali zdrave biljke, plodove dobrog kvaliteta, ulje dobrog kvaliteta, i kako bi ekonomski gubici usled šteta bili što manji.

Štetočine koje napadaju maslinu a prezimljuju na stablima su štitatke vaši (maslinin medić *Saissetia oleae*), trips *Liothrips oleae*, maslinina pipa, potkornjaci. Prouzrokovaci bolesti su gljivice izazivači truleži plodova *Gleopsis olivarum*, *Sphaeropsis dalmatica*, paunovo oko - *Spilocaea oleagina*, bakterija izazivač rak-rana na maslina *Pseudomonas savastanoi*.

Tretiranjem u mirovanju vegetacije se preventivno djeluje te se uništavaju prezimljujuće forme fitopatogenih gljiva i bakterija i djeluje se na prezimljuće stadijume štetočina te se vrši jedna opšta dezinfekcija biljaka koja će pomoći da se u toku vegetacije smanji napad štetočina i bolesti. Zaštita se može obaviti poslije rezidbe ili u bilo kome periodu mirovanja vegetacije vodeći računa da vrijeme bude mirno, bez vjetrova, padavina i niskih tem-

peratura. Posebno voditi računa o mladim zasadima i osjetljivosti mladih maslina na niske temperature koje mogu izazvati oštećenja na svim djelovima biljke.

Bili bi dobro obaviti čišćenje maslinjaka od zaostalih biljnih djelova, ukloniti oštećene i suve grane sa stabala i obaviti zimsko tretiranje.

U tu svrhu mogu se upotrijebiti preparati na bazi bakra i mineralnog ulja kao što je Crveno ulje 2-3% i primijeniti jedno do dva tretiranja. Bakar djeluje na prouzrokovace bolesti a mineralno ulje na prezimljujuće stadijume štetočina. Bakarni preparati i mineralna ulja mogu se primijeniti i u odvojenim tretiranjima.

Ukoliko ima maslinara koji imaju namjeru baviti se organskom proizvodnjom masline i maslinovog ulja ili preorijentirati svoju proizvodnju iz konvencionalne u organsku trebaju se posavjetovati sa savjetodavnom službom te koristiti preparate koji su dozvoljeni za tu namjenu kao npr. neotrovna biljna ulja i ekološke preparati na bazi bakra.
